

AIRFIRE
BORE CLEANER

LEAD	GREASE	OIL
------	--------	-----

PRODUCT DESCRIPTION

AIRFIRE is specially formulated to remove a wide range of lead, oils, and grease associated with PCP and air rifle use. Tested by some of the best marksmen in South Africa, this solvent was specially formulated to account for the differences between an air rifle and PCP barrels compared to traditional rifle barrels.

The result is a focus-driven, high-powered barrel cleaner for a new generation of weaponry. Why change the quality of a cleaner simply because the rifle mechanism changes? Different application - same quality guaranteed.

60 ml | VLD - AFR60
150 ml | VLD - AFR150

RECOMMENDED DIRECTIONS

BORE CLEANING

- STEP 1** Secure and unload the firearm.
- STEP 2** Wet 3 patches with RIMFIRE and push through the barrel. Run patches slowly through to give solvent time to react with the bore surface.
- STEP 3** Run 10 passes through using a nylon brush soaked in RIMFIRE. Do not use a brass brush.
- STEP 4** Wet another 3 patches with RIMFIRE, run through, then leave the product in the bore for 3-5 minutes. Extend the time for extreme fouling.
- STEP 5** Continuously run dry patches through until the patches gather no residue at the barrel tip.
- STEP 6** Before storing your firearm dampen a patch with GT150 GUN OIL, run it through the bore as this will prevent rust and dust from settling on your firearm. For long term storage use RIFLEARMOR.
- STEP 7** Finish with 2 dry patches. Before storing a firearm, run through a patch dampened with HP88 LUBE as this will prevent rust and dust from settling on your firearm.

PLEASE NOTE RIFLEARMOR is suggested for long-term storage. DO NOT USE RIFLEARMOR inside the barrel of your air rifle. Always run a clean, dry patch through the firearm before use to avoid any obstructions. Do not fire a projectile or round with the product inside the barrel. Make sure that the rifle is dry before use. Dry fire the rifle or handgun after thoroughly drying the barrel.

RECOMMENDED

REMOVAL OF LEAD,
GREASE AND OILS

COMPATIBILITY

PCP
AIR RIFLES
PAINTBALL GUNS
AIRSOFT

AIR MARKSMAN
COMBO

- This is all you will need to clean your air rifle, PCP or airsoft firearm.
- VELDT AIR MARKSMAN Combo Pack consists of 1 lubricant and the cleaner suited for the industry.
- HP88 Lube is a synthetic oil that is not flammable under extreme pressure conditions and will not "diesel" under these conditions. All round gun oil for preventing rust and repelling water. This lubricant will leave a thin layer of protection best suited for the best air marksmen.
