

DFNDR

EXTERIOR RIFLE CLEANER AND PRESERVER FOR RUBBER, POLYMERS

PRODUCT DESCRIPTION

DFNDR is a non-greasy polymer, plastic, and rubber treatment formulated to be used for cleaning and protecting all polymer and plastic gun parts. DFNDR restores the deep natural finish and shine, and it does not matter what your gun stock or firearm body is made of this product caters to all.

The formulation used will ensure that your equipment maintains its gun shop shine and that no surface corrosion and fouling make your firearm look dated and uncared for.

Although it is extremely important to care for the parts inside your firearm it is equally important to care for the outside.

Want to make it look like NEW? Give it some DFNDR!

AEROSOL
200 ml | VLD - DFN200

RECOMMENDED DIRECTIONS

- Secure and unload the firearm.
- DFNDR can be used on most plastic, rubber, or polymer surfaces but please avoid using DFNDR on scope glass as this may cause an oily residue to stick to glass parts.
- Spray DFNDR thinly and evenly onto a clean microfiber cloth, and or directly onto the surface of the rifle stock, scope, or accessories.
- Allow DFNDR to penetrate the surface for a few minutes.
- Buff and clean excess DFNDR to a final gloss and shine with a microfibre cloth.
- Ensure equipment and parts are wiped clean and dry before reassembly.
- This remains a chemical so test on surfaces before using.
- Not recommended for raw wood stocks or wooden accessories.

SPECIAL ABILITY

DFNDR is a unique product designed and developed specifically for cleaning rubber, and or plastic/polymer stocks, and firearms. Can be used also on the outside of handguns.

Brightens and nourishes the surface of the firearm

Quick drying with a "non-sticky" technology allows for DFNDR to be used on other firearms accessory parts for example scope metal surfaces, with soft-touch technology that leaves your metal parts looking bright and new.

Superior cleaning ability with precision chemical technology for the precision enthusiast.
