

## CUBUSTER

BORE CLEANER FOR HEAVY COPPER FOULING

COPPER

## PRODUCT DESCRIPTION

CuBUSTER is chemically formulated to act on heavy layers of copper and to treat heavy copper fouling in rifles and sidearms. This product is especially for guns that are not regularly cleaned and require intensive cleaning care.

A blue indicator on your cleaning patch will confirm an effective copper removal from the barrel. You will go bananas for CuBUSTER's extremely effective copper removal together with its light tropical scent.

CuBUSTER is the ultimate copper stalker to restore your heavily fouled firearm to its former glory.

60 ml | VLD - CuB60  
150 ml | VLD - CuB150

## RECOMMENDED DIRECTIONS

## BORE CLEANING

- STEP 1** Secure and unload the firearm.
- STEP 2** Wet 3 patches with CuBUSTER and push through the barrel. Run patches slowly through to give solvent time to react with the bore surface.
- STEP 3** Run 15 passes through using a nylon brush soaked in CuBUSTER. Do not use a brass brush.
- STEP 4** Wet another 3 patches with CuBUSTER, run through, then leave the product in the bore for 3-5 minutes. Extend the time for extreme fouling.
- STEP 5** Continuously run dry patches through until the patches gather no residue at the barrel tip.
- STEP 6** Before storing your firearm dampen a patch with GT150 GUN OIL, run it through the bore as this will prevent rust and dust from settling on your firearm. For long term storage use RIFLEARMOR.
- STEP 7** Always run a clean, dry patch through the firearm before use to prevent any obstructions

**PLEASE NOTE** This product is not intended for use on wood, varnishes, coatings, plastic and polymers. It may not harm it but it was not intended for this purpose.

## RECOMMENDED

REMOVAL OF HEAVY COPPER FOULING.

## COMPATIBILITY

AR, BOLT AND CARRIER  
PISTOLS  
REVOLVERS  
AGED AND NEGLECTED FIREARMS

## SPECIAL ABILITY

CuBUSTER removes more copper per patch than any other cleaner without any ammonia or harsh smelling chemicals. The built-in blue copper indicator will react immediately with copper, brass and Nickel. Please use for intended purpose to avoid damage.

XTERMIN8R was designed as the normal, run-of-the-mill, bore cleaner and has a superior copper removing ability. Although XTERMIN8R will remove copper it will be faster and use a lot less solvent to make use of CuBUSTER for extreme copper removal.

Superior cleaning ability with precision chemical technology for the precision enthusiast.
